ABOUT UCOST

The workshop is supported by the Department of Information, Science & Technology, Uttarakhand State Council for Science and Technology (UCOST), Dehradun under its Patent Information Centre (PIC) initiative to promote intellectual property awareness and innovation among students, researchers, and academicians.

ABOUT COLLEGE OF PHARMACY

College of Pharmacy, Shivalik Campus, established in 2019, is a center of excellence in pharmaceutical education and research. We are committed to nurturing industry-ready pharmacy professionals, guided by Outcome-Based Education (OBE) – emphasizing not just knowledge acquisition but the development of practical skills and a global outlook. Our faculty, comprising experienced academicians and industry experts, brings a rich blend of academic insight and real-world perspective to the classroom.

ABOUT THE WORKSHOP

Intellectual Property Rights (IPR) play a vital role in protecting innovations and research outcomes across diverse fields such as Science and Technology, Life Sciences, Health Sciences, and Engineering. Researchers and students often focus primarily on experimental work, technological development, and scientific discoveries but may lack adequate knowledge regarding the legal protection of their innovations. Insufficient awareness about patents, copyrights, trademarks, industrial designs, and other forms of intellectual property may lead to premature disclosure of research findings, which can result in the loss of patentability and potential commercialization opportunities.

This workshop aims to create awareness about the importance of intellectual property protection and to provide practical insights into patent searching, patent drafting, filing procedures, and the commercialization of research outcomes. The program is designed to encourage innovation, strengthen research ethics, and help participants understand how intellectual property management can support technology transfer, entrepreneurship, and startup development in various scientific and technological domains.

OBJECTIVES OF WORKSHOP

- To create awareness about Intellectual Property Rights among innovators and researchers.
- To understand different types of intellectual property such as patents, trademarks, copyrights, and industrial designs.
- To provide practical training on patent searching using databases such as Google Patents and IP India.
- To understand the process of patent drafting and filing.
- To promote innovation, research commercialization, and startup development.
- To educate participants about research ethics, plagiarism, and academic integrity
